FIG. 1

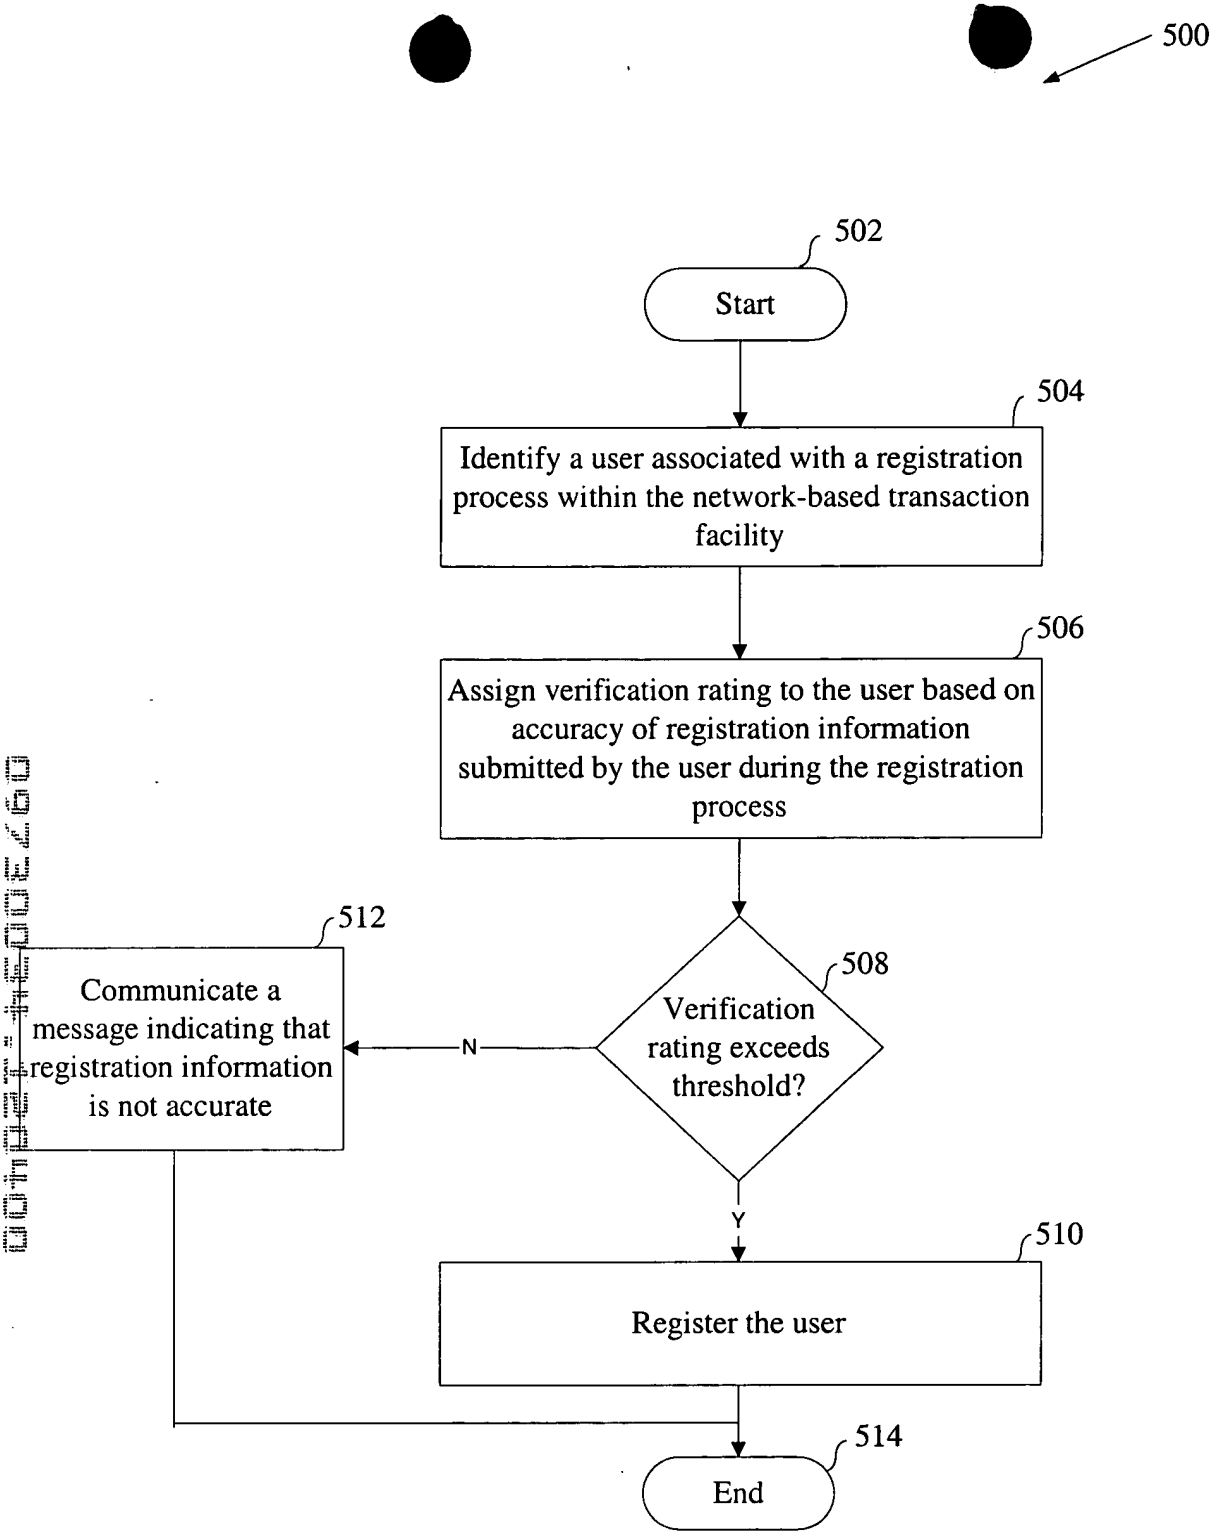

500
502
Start
504
Identify a user associated with a registration process within the network-based transaction facility
506
Assign verification rating to the user based on accuracy of registration information submitted by the user during the registration process
508
Verification rating exceeds threshold?
N
512
Communicate a message indicating that registration information is not accurate
Y
510
Register the user
514
End

FIG. 5

Docket #E00260

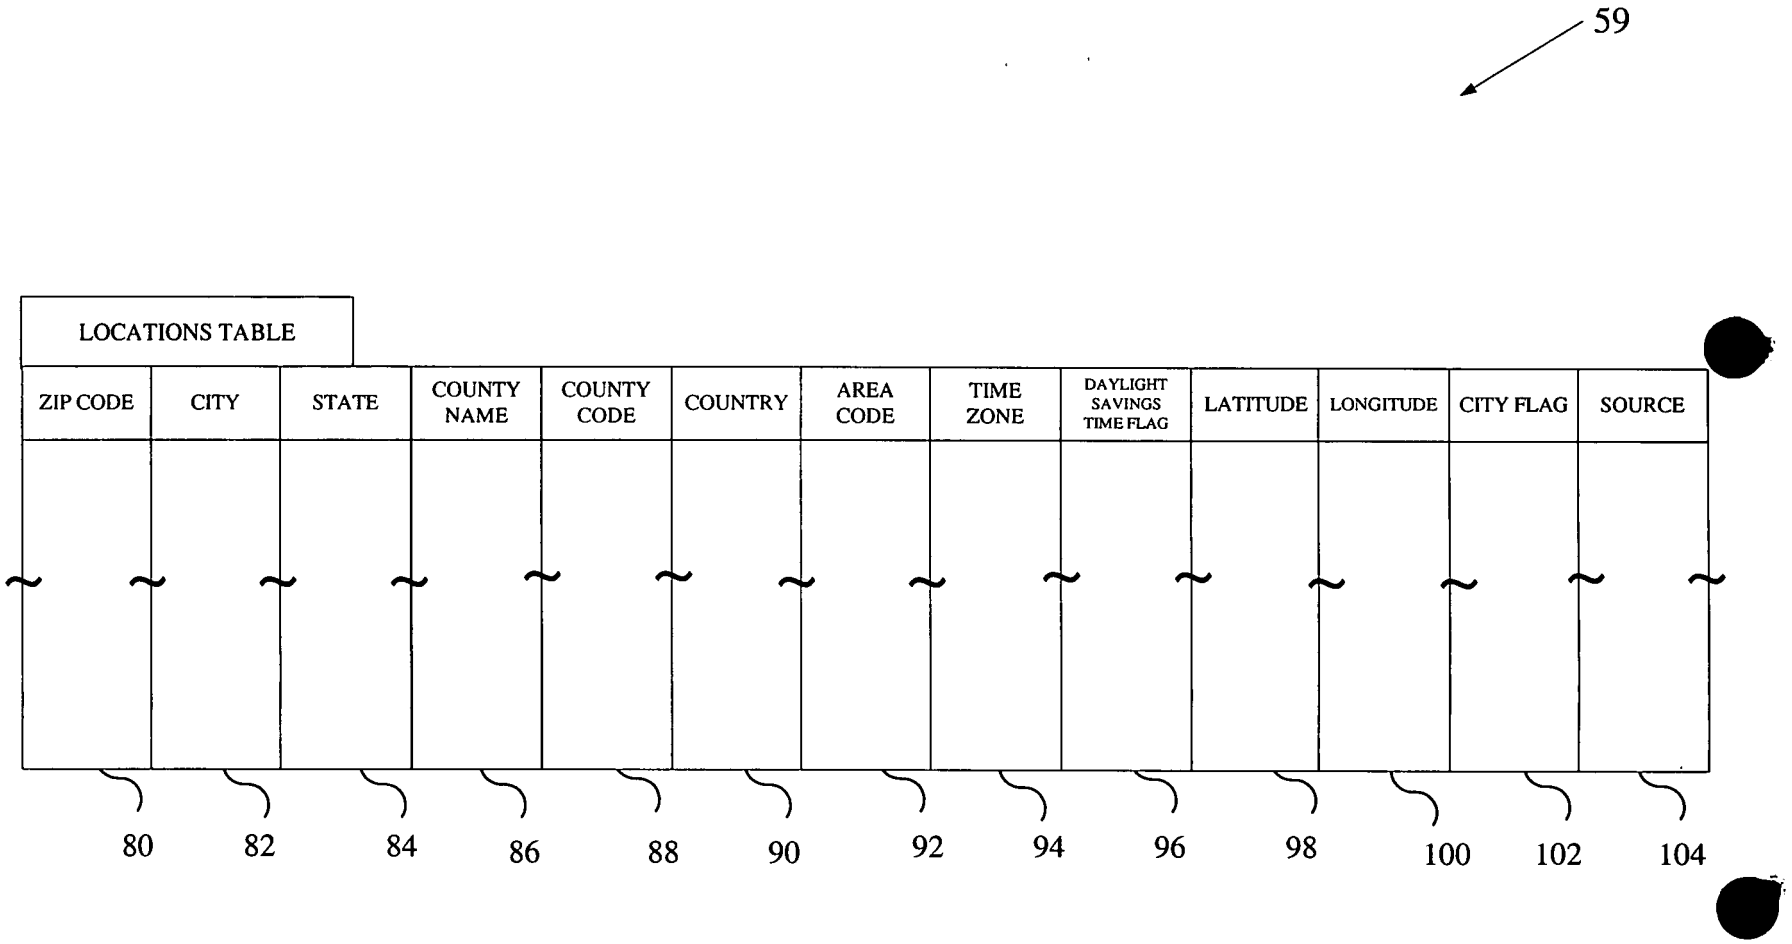

FIG. 4

00h02F"h£00£260

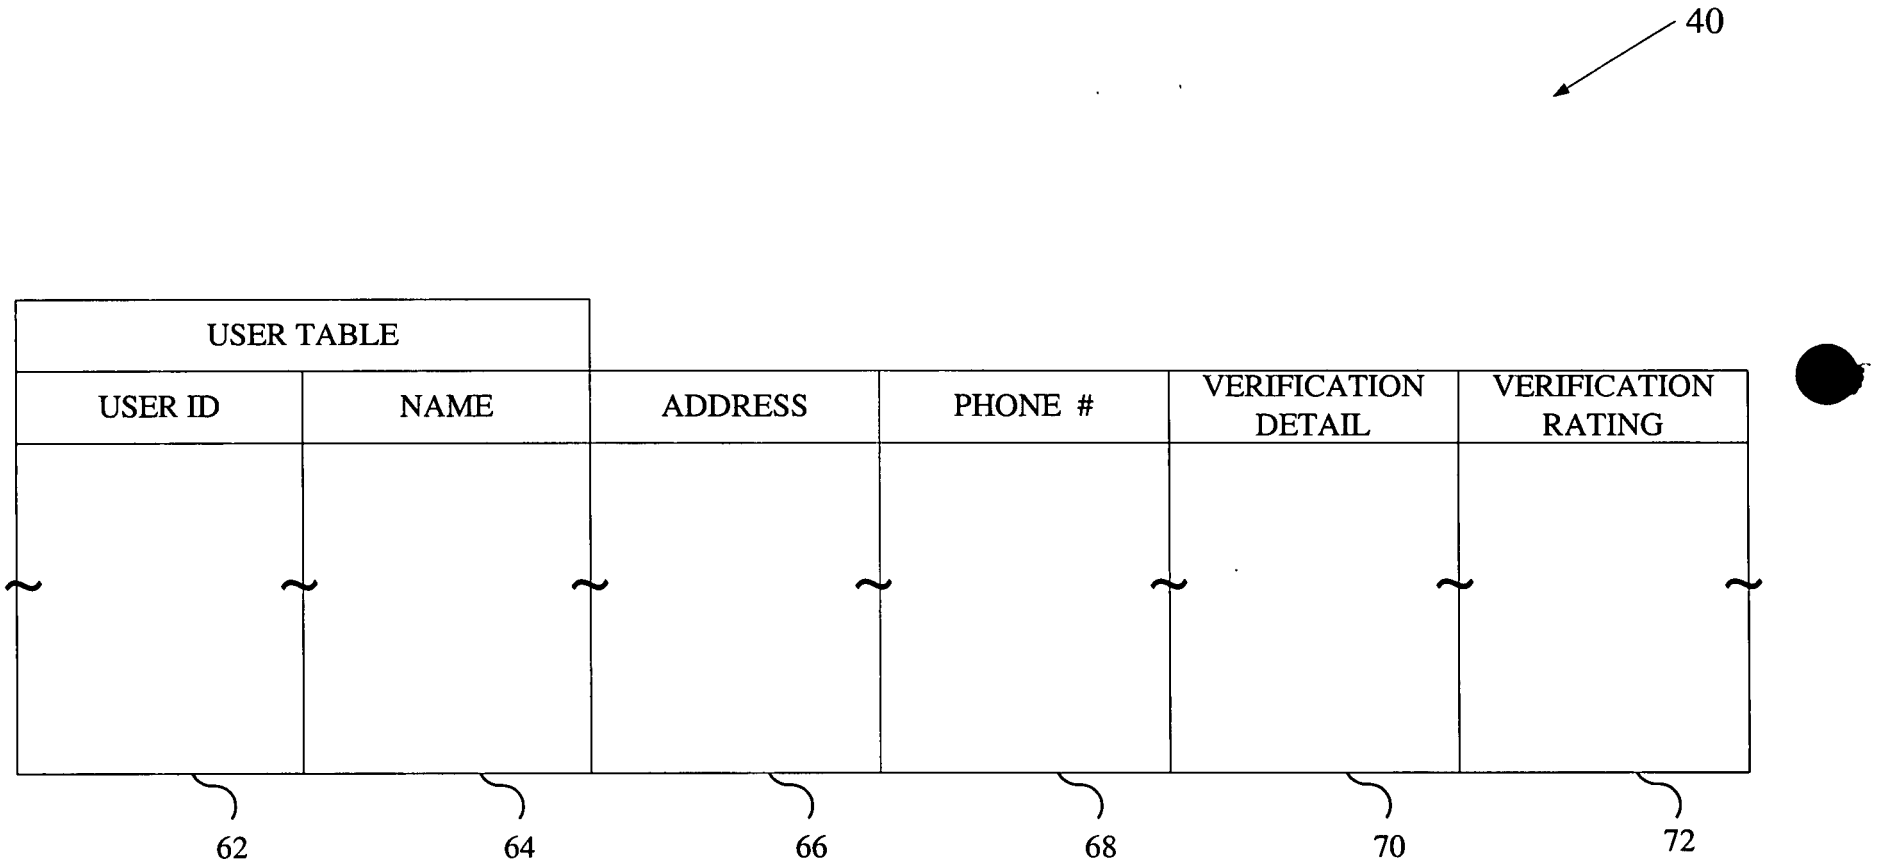

FIG. 3

09704027 - 112306

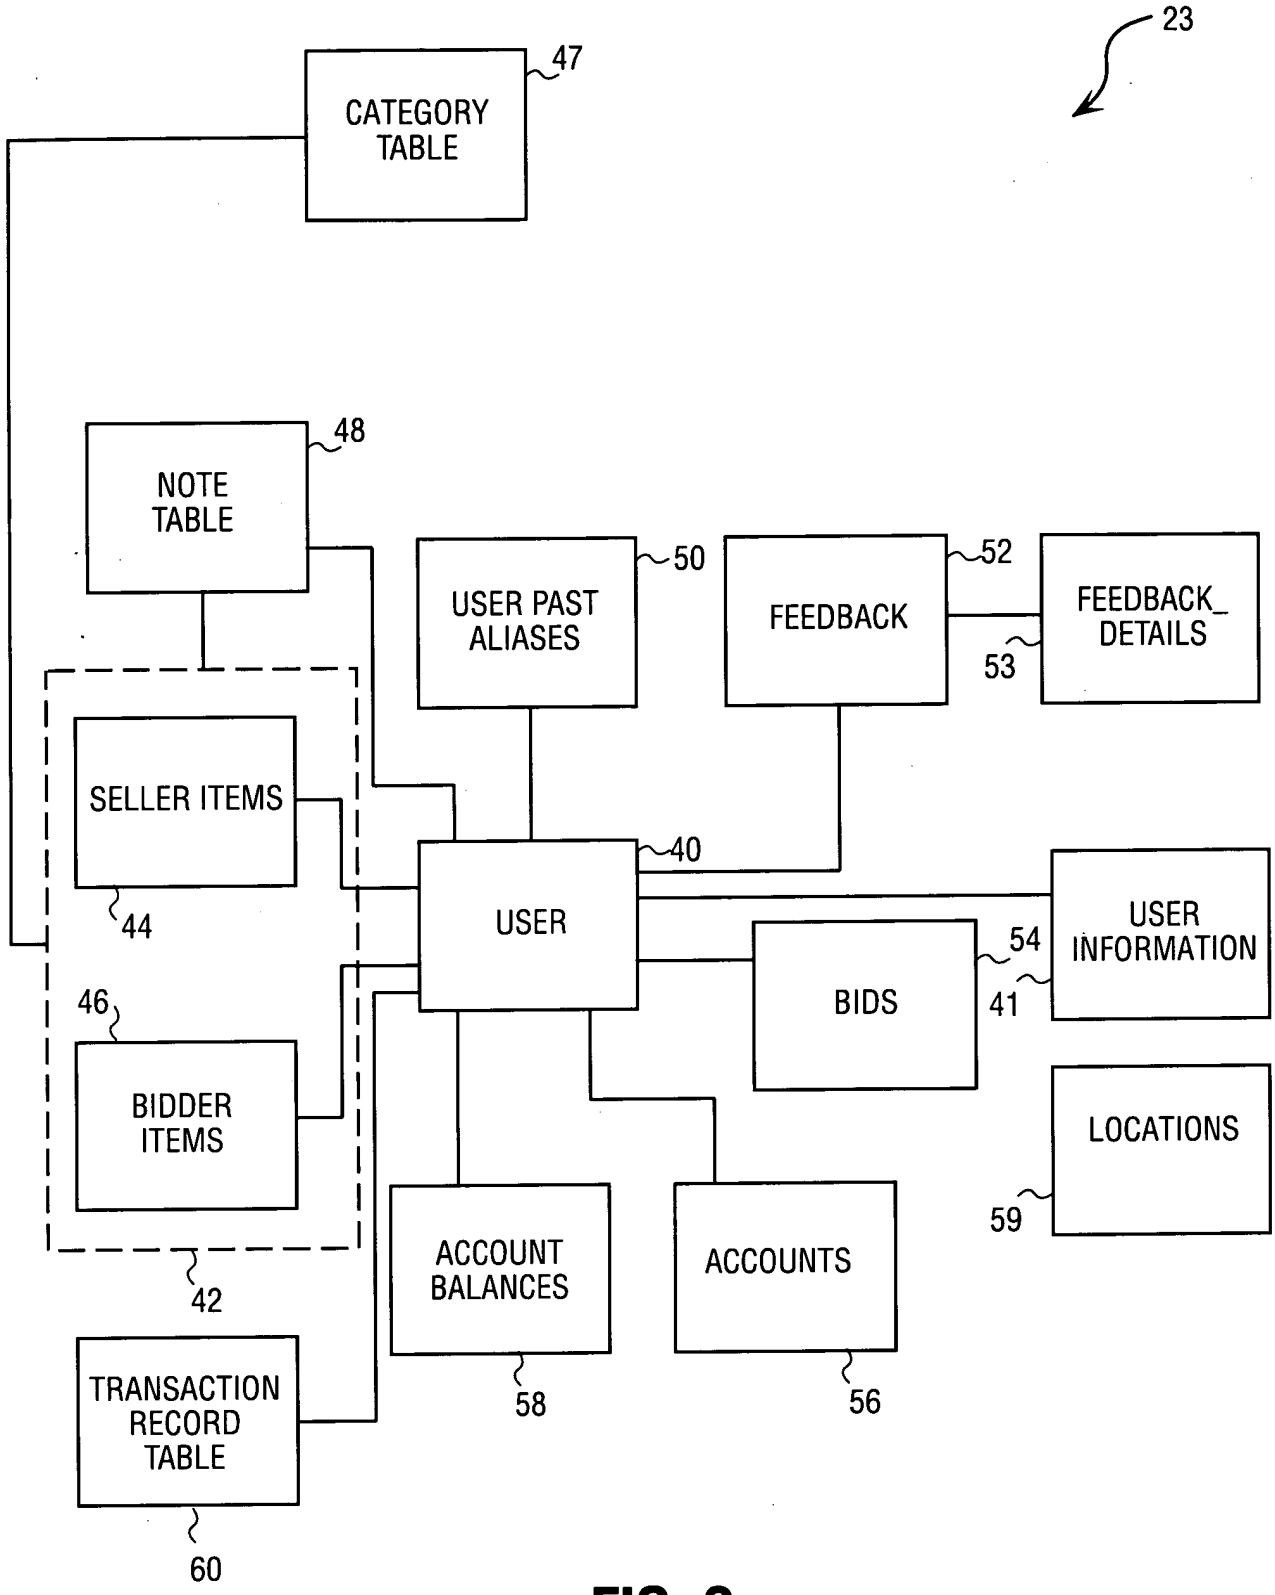

FIG. 2

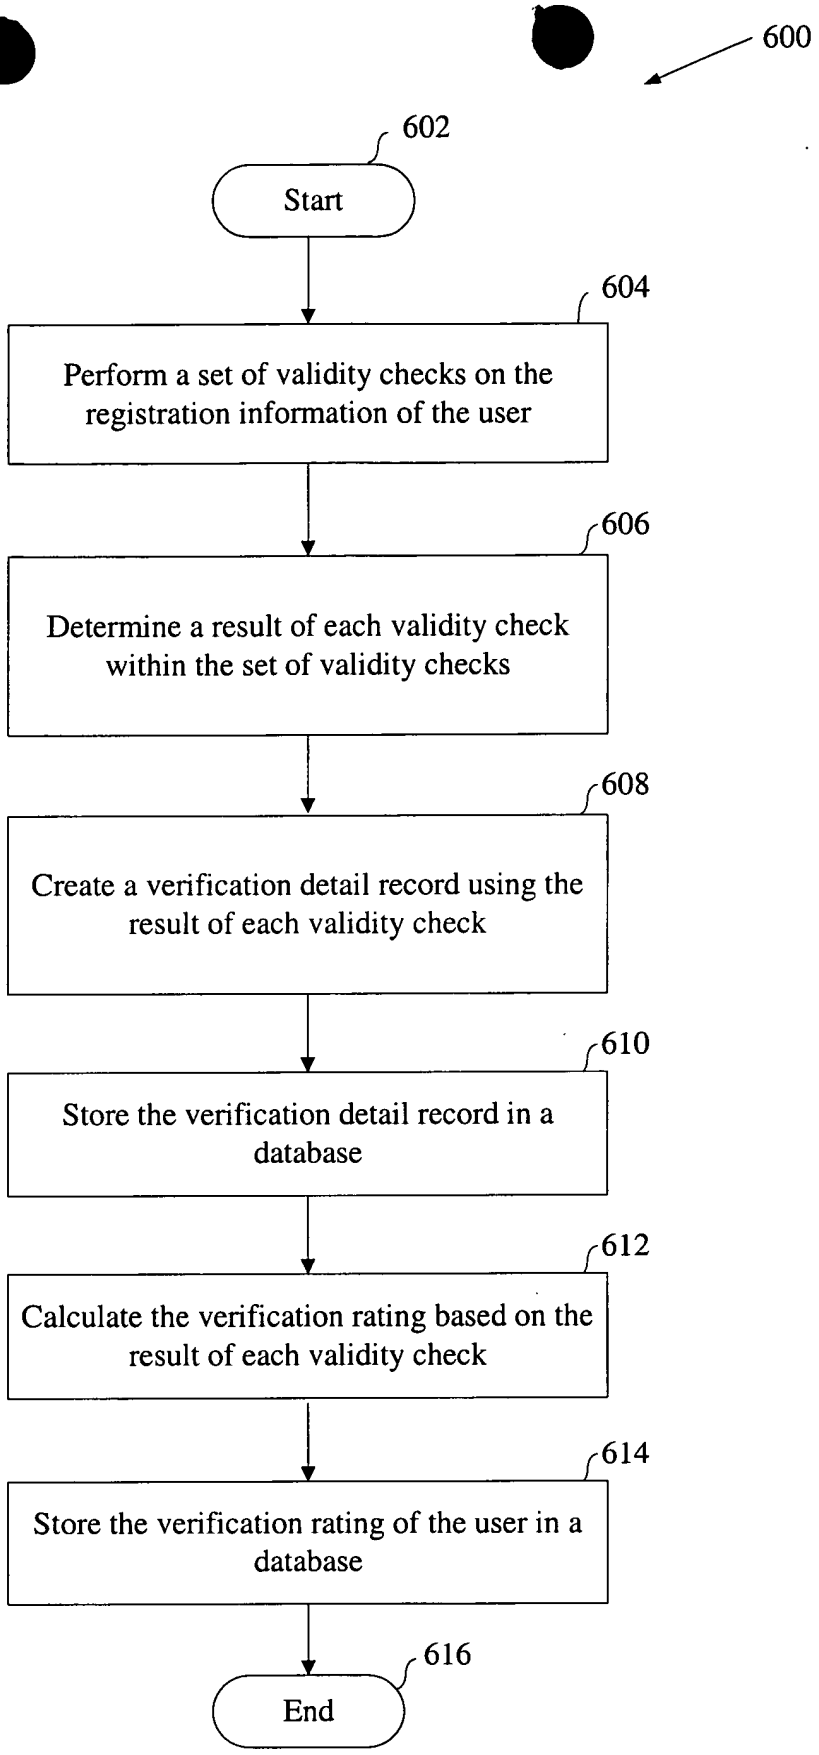

600
602
Start
604
Perform a set of validity checks on the registration information of the user
606
Determine a result of each validity check within the set of validity checks
608
Create a verification detail record using the result of each validity check
610
Store the verification detail record in a database
612
Calculate the verification rating based on the result of each validity check
614
Store the verification rating of the user in a database
616
End

FIG. 6

Validity Checks (702)	Scores (704)	Bit In Verification Detail Record (706)
Does the phone number contain at least 10 digits?	-20/+0	1
Is the area code a real area code?	-2/+2	2
Is the zip code a real zip code?	-2/+2	3
Does the zip code match the state?	-1/+1	4
Does the area code match the state?	-1/+1	5
Is the zip code within 100 miles of the area code?	-1/+1	6
Does the zip code match the city?	-1/+1	7
Does the area code match the city	-1/+1	8
